

The VA's commitment to move into this realm of research, to advance our knowledge of the relationship of the genome to a host of physical and mental conditions relevant to veterans, is completely in keeping with the investigative nature of VA medicine. For 75 years our researchers and clinicians have been breaking exciting ground in virtually every aspect of medicine, with most of their work resulting in new and better ways to treat the myriad illnesses of our veterans. From Nobel Prize-winning researchers—and the VA's had three Nobel Prize winners—from Nobel Prize winners to the CAT scan to paperless records technologies, to kidney transplants, to microchip-drive prosthetics, to medical school partnerships that have trained more than half of our nation's physicians today, we are leading the world in our care for our veterans.

As I've outlined, we've done a great job so far. We are a world-class healthcare network when it comes to treating existing illnesses and disabilities. But then we ask ourselves, what if we knew how to identify the earliest possible signs of a veteran's predisposition to a particular disease? What if we knew in advance how a veteran would react to a particular drug therapy? What if we could reasonably forecast the risks a particular veteran might face with respect to some forms of cancer? What if, summing up, we could move from providing medicine that is preventative to medicine that is predictive?

With the advent of the Genomic Medicine Advisory Committee, we are positioning the VA to take a new journey, a truly great journey along the DNA trail. It is a path still not well lighted. There are so many questions of ethics and privacy that we are not going to proceed down that trail without first assessing the risks and benefits to our veterans. But we know from past experience that once we determine that a VA program is in the best interest of our veterans, we move forward with all the resources we can muster.

And when VA health care is on the move, we change the nation's healthcare landscape for the better. As medical practice incorporates the advances of science, we must harness VA's triple mission of health care, research and training to bring these advances to the veterans we serve.

I'm confident our new push down the genomic road will benefit not only our veterans, but the larger national health care community as a whole, as so much of our other research has done, such as the development of the CAT scan and the pacemaker and the first liver transplant done at the VA.

A TRIBUTE TO PARTHENIA HOLLIDAY

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 30, 2006

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Parthenia R. Holliday and I hope my colleagues will join me in recognizing the accomplishments of this outstanding member of the community.

Parthenia R. Holliday was born in Philadelphia, PA.

Her childhood years were like so many others filled with challenges, crossroads and hur-

dles that seemed uncrossable. At the tender age of 16 she knew her life long dream and desire was the wonderful art of singing. Her father and other sibling also were musically inclined and played instruments and sang, and so it was in her blood to sing and sing she did.

Ms. Holliday sang all over the world from Budapest, Hungary, Russia, Africa, and most recently in 2005 in London, England. She has also performed with Alvin Slaughter and others.

Ms. Holliday sang in many establishments in New York City and New Jersey. Unfortunately, Ms. Holliday found herself entangled in substances that were not healthy, or helpful for her continued growth and high self-esteem. Ms. Holliday's life took a wonderful change in her early 20s, hearing the promises of God, she accepted Jesus Christ as her lord and savior. The word of deliverance was preached unto her and after many trials and errors, the chains that bound her were broken and the broken pieces of her life were put back together again. Nothing became more important to Ms. Holliday than to do the will of Him who called her out of darkness to the marvelous light.

Ms. Holliday combined the fields of dentistry and elder care for a lifetime of caring and sharing. However, she believes her greatest gift is fundraising. Ms. Holliday received a certificate for great community services from the Honorable State Senator John L. Sampson for her accomplishments at the Bible Speaks Church and Christian School of Brooklyn, NY.

Mr. Speaker, I believe that it is incumbent on this body to recognize the accomplishments of Parthenia R. Holliday as she offers her talents for the betterment of our local and national communities.
